Mirashare is a cloud-based software suite catering to a wide variety of organisations' needs, from Risk Management and Change Control, to Incident and Near Miss reporting using the latest Mobile technology (IOS & Android). The wide choice of modules enables an organisation to benefit from features that go beyond health and safety, to support business improvement, control and compliance.

Mirashare helps to create an environment where EHS is part of the culture – a culture where all employees are engaged in driving improvements in EHS performance.

Who are we?

Mirashare is provided by Elmstone Systems Limited, a software company who have been delivering first class products using cutting edge technology for the last 20 years. Our experienced and knowledgeable team are skilled not only in our Mirashare software, but also in EHS management practice. We work hand in hand with you to make sure that Mirashare fits your approach, enabling your organisation to drive stronger engagement in creating a safer and healthier working environment.

Mirashare Software – Driving Strategic Advantage

Here's what some of our clients say:

Thank you for all the great support and service over the last few years and for helping me in my career. I feel I may not have been as successful as I have if it wasn't for your great (Mirashare) product and your wise counsel in deploying it.

SHE Manager, Large medical devices company, Ireland

Since we started using Mirashare we have seen an improved alignment of our procedures which has helped increase productivity and H&S compliance. Overall, Mirashare has positively influenced a better H&S culture, improved compliance and ensured high H&S standards are confluent throughout the business.

International manufacturer and supplier of advanced consumer diagnostics products

The inspectors were generous in their praise of our systems stating "Of all the places I have inspected, I am feeling pretty confident about you guys"

Extract from an HSE inspection regarding Mirashare Change Control at a large Pharmaceutical client

... Elmstone Systems' products are always a pleasure to use and offer intuitive and user-friendly interfaces which enable the maximum advantage to be made of moving from traditional to electronic solutions.

In my experience, I would have no hesitation in rating them 'top of the class'.

Multinational Manufacturing client

Mirashare – the platform to deliver excellence in EHS management

The lifeblood of an effective EHS system is information. Information collected at the right place, at the right time, in the right format. Information available to those who need it, when they need it. Information acted upon!

Mirashare is a comprehensive and highly customisable platform designed to support EHS management in the most challenging of organisations. This flexibility provides a scalable solution which is currently adopted by thousands of users from small and medium size businesses to large multi-national companies. With an ever expanding suite of currently 14, our four core modules are:

- **Incident Management** – Capture and record comprehensive data about incidents, accidents and near misses. Provide vital information needed to carry out thorough controlled investigations and root cause analysis. Report incidents remotely using the Mirashare fully integrated Mobile App, and notify the right people instantly through automated email or SMS message.
- **Risk Assessment** – Supports all types of risk assessment, including manual handling, task based & confined space. All hazards are recorded and rated on their probability and severity using a configurable risk management matrix. Corrective and preventative actions are allocated and monitored to completion. Full version control means you can manage your risk assessment process with complete confidence.
- **Audit and Inspection** – A totally configurable means of recording and scoring all kinds of inspections, such as fire safety, site inspections, ISO14001, and Data Protection. An ideal repository for recording corporate and external audits, their outcomes, observations and actions. Scheduler functionality helps set up and manage recurring audits, saving time on administration.
- **Action Tracking** – Integrated with all our Health and Safety modules, or used as a standalone module, Action Tracking captures corrective and preventative actions and records their progress. Ensure managers are kept in the loop automatically when actions become overdue through a predefined escalation workflow, improving control, compliance and efficiency.
